THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

DETAILED ACTION

Response to Amendment/Remarks

Continued Examination Under 37 CFR 1.114

I. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/13/2008 has been entered.

Allowable Subject Matter

II. The following is an examiner's statement of reasons for allowance:

Claim 1 recites a method of setting a transport format combination (TFC) in a broadband code division multiple (CDMA) communication system with steps as defined in the specification (pages 4-12) including transmitting from a radio resource control (RRC) layer both transport format set (TFS) information and transport format combination set (TFCS) information during a channel initialization for data transmission among respective layers of the broadband CDMA communication system; selecting at a medium access control (MAC) layer an initial TFC for preferentially allocating a maximum packet data unit (PDU) value to a transmission channel on which a logic channel having a relatively high priority among a plurality of transmission channels has been mapped, wherein the allocation is initially achieved by analyzing the received TFS information and the TFCS information; transmitting an initial PDU value from the MAC layer to a radio link control (RLC) layer including respective logic channels by allocating the

initial PDU value according to the initial TFC to the respective logic channels before receiving buffer occupancy information from the radio link control (RLC) layer; and transmitting at the radio link control (RLC) layer initial transmission data along with buffer occupancy information of a transmission buffer to the MAC layer based on the received initial PDU value.

Applicant's independent claim 1 comprises a particular combination of elements, which is neither taught nor suggested by the prior art.

Claims 2-5 are allowable based on their dependence of independent claim 1.

Claim 6 recites a method of setting a transport format combination (TFC) in a broadband code division multiple (CDMA) communication system with steps as defined in the specification (pages 4-12) including transmitting from a radio resource control (RRC) layer both transport format set (TFS) information and transport format combination set (TFCS) information during a channel initialization for data transmission among respective layers of the broadband CDMA communication system; selecting at a medium access control (MAC) layer an initial TFC using the received TFS information and the TFCS information, allocating an initial PDU value according to the initial TFC to the logic channels mapped on the corresponding transmission channel; transmitting from the MAC layer the initial PDU value to a radio link control (RLC) layer including respective logic channels before receiving buffer occupancy information from the radio link control (RLC) layer; and transmitting at the radio link control (RLC) layer an initial transmission data along with buffer occupancy information of a transmission buffer to the MAC layer based on the received initial PDU value.

Applicant's independent claim 6 comprises a particular combination of elements, which is neither taught nor suggested by the prior art.

Claim 7 recites a method of setting a transport format combination (TFC) in a broadband code division multiple (CDMA) communication system with steps as defined in the specification (pages 4-12) including receiving at a medium access control (MAC) layer both transport format set (TFS) information and transport format combination set (TFCS) information from a radio resource control (RRC) layer during a channel initialization for data transmission among respective layers of the broadband CDMA communication system; selecting an initial TFC by analyzing the received TFS information and the TFCS information, wherein the initial TFC preferentially allocates a maximum packet data unit (PDU) value to a transmission channel on which a logic channel having a relatively high priority among a plurality of transmission channels has been mapped; allocating an initial PDU value according to the initial TFC to the logic channel mapped on the corresponding transmission channel; transmitting the initial PDU value to a radio link control (RLC) layer including respective logic channels before receiving buffer occupancy information from the radio link control; and transmitting at the radio link control (RLC) layer initial transmission data along with buffer occupancy information of a transmission buffer to the MAC layer based on the received initial PDU value.

Applicant's independent claim 7 comprises a particular combination of elements, which is neither taught nor suggested by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
